General specifications

- Valve elements with solenoid operated directional spool.
- Control spools operated by solenoids with removable coils.
- In the de-energized condition, the control spool is held in the central position by return springs.
- Wet pin tubes for DC coils, with push rod for mechanical override; nickel plated surface.
- Coils can be rotated 360° around the tube; they can be energized by AC current through special connectors with rectifier (RAC).
- Manual override (push-button or screw type) available as option.

Principles of operation, cross section

The sandwich plate design directional valve elements L511... are compact direct operated solenoid valves which control the start, the stop and the direction of the oil flow. These elements basically consist of a stackable housing (1) with a control spool (2), one or two solenoids (5), and one or two return springs (4). When energized, the force of the solenoid (5) pushes the control spool (2) from its neutral-central position "0" to the required end position "a" or "b", and the

required flow from P to A (with B to T), or P to B (with A to T) is achieved. Once the solenoid is de-energized, the return spring (4) pushes the spool thrust washer (3) back against the housing and the spool returns in its neutral-central position.

Each coil is fastened to the solenoid tube by a ring nut (6). A pin (7) allows to push the spool (2) in emergency conditions, when the solenoid cannot be energized, like in case of voltage shortage.

Technical Data (for applications with different specifications consult us)

General

Valve element with 2 solenoids	kg [lbs]	1.82 [4.0]
Valve element with 1 solenoid	kg [lbs]	1.33 [2.9]
Valve element with 2 solenoids, with lever type emergency	kg [lbs]	2.1 [4.6]
Valve element with 1 solenoid, with lever type emergency	kg [lbs]	1.6 [3.5]
Ambient Temperature	°C [°F]	-20....+50 [-4....+122] (NBR seals)

Hydraulic

Maximum pressure at P, A and B ports	bar [psi]	310 [4500]
Maximum pressure at T	bar [psi]	250 [3625]
Max pressure, with lever type emergency at T	bar [psi]	200 [2900]
Maximum inlet flow	l/min [gpm]	50 [13.2]
Hydraulic fluid		Mineral oil based hydraulic fluids HL (DIN 51524 part 1). Mineral oil based hydraulic fluids HLP (DIN 51524 part 2). For use of environmentally acceptable fluids (vegetable or polyglycol base) please consult us.
Fluid Temperature	°C [°F]	-20....+80 [-68....+176] (NBR seals)
Permissible degree of fluid contamination		ISO 4572: $\beta_{x \geq 75} X=12...15$ ISO 4406: class 20/18/15 NAS 1638: class 9
Viscosity range	mm ² /s	5...420
